

How to find after-sales service for solar panels

What if I have a broken solar panel?

If you have a broken solar panel, call our Service Department first. You should never attempt to remove a solar panel on your own. Our service team will either repair it off-site, or recycle the panel at a glass recycling facility. Alternatively, you can post your panel online and give it to someone who will repurpose it.

Can solar panels be repaired?

Yes, solar panels can be repaired depending on the type of damage, but it's typically better to replace the damaged panels. Our Service Department can inspect your system to see whether the fix can happen on-site.

How do I know if my solar panel is broken?

The most reliable way for you to know if your solar panel is broken is to check their energy output during the day and see whether it's less than normal. Lower output indicates something isn't working properly. You can connect with our Service Department to get a monitoring report for your system. What happens if a solar panel cracks?

Should you ask a solar installer about the equipment they choose?

Luckily, SolarReviews offers real customer reviews of solar panels, inverters, batteries, and more. That doesn't mean you shouldn't ask the installer about the equipment they choose. You should! Here are the questions to ask about solar panels and other equipment: Why did you choose the equipment you did?

How do I choose a solar installer?

Choose a solar installer. An installer can help you determine whether your roof is suitable for solar panels. Begin by researching qualified, insured installers online or asking for recommendations from people who've gone solar. Comparison-shop by asking multiple installers to come assess your roof.

How do you evaluate a solar company?

The rankings were utilized and referenced by a diverse mix of policymakers, advocacy groups, and media including The Center... As you're evaluating solar companies, it's important to ask questions about the company, the equipment, money, the work being done, and the future.
