

Longi monocrystalline photovoltaic panel price

What makes LONGi Solar a Tier 1 solar panel brand?

A Tier 1 solar panel brand, LONGi Solar integrates state-of-the-art features like PERC (passivated emitter and rear contact) technology, which enhances solar panel efficiency by reducing energy loss and maximizing electricity generation from the sun's rays. All its panels are half-cut cell modules, increasing their efficiency.

Does LONGi Solar produce monocrystalline cells?

LONGi Solar only produces monocrystalline products, and the company was largely responsible for driving the solar industry back towards more efficient monocrystalline cells after polycrystalline cell technology previously dominated the market since 2012 due to lower production costs.

What solar panels does Longi offer?

What solar panel modules does LONGi offer? LONGi offers four main module series, the Hi-MO 7, Hi-MO X6, Hi-MO 5, and Hi-MO 5m-- but only the Hi-MO 5m Series offers panels for residential use. Bifacial solar panels are not practical for residential installations but have gained popularity in commercial applications over the past few years.

What temperature do LONGi Solar panels operate?

LONGi solar panels are designed to operate in temperatures ranging from -40°F to 185°F , however, like most solar panels, LONGi panels reach their maximum efficiency at lower temperatures. We have a variety of different LONGi solar panels for sale for residential and commercial installations.

Which bifacial solar panels do Longi sell?

LONGi sells four primary solar panel models: Hi-MO 9, Hi-MO 7, Hi-MO X6, Hi-MO 5 and Hi-MO 5m. The Hi-MO 5m Series is the company's residential line. Bifacial solar panels are mostly used in commercial settings. The most efficient solar panels typically have an efficiency above 22%, but 19% is just fine for residential use.

What are the different types of LONGi Solar panels?

The current models are the Hi-MO 4 and Hi-MO 5 series, with the new advanced Hi-MO 6 panels due to be released in early 2023. LONGi's Hi-MO 5m panels are designed for residential rooftop solar systems while the larger format Hi-MO 5 panels are for commercial and utility-scale installations.
