Are solar energy stocks a good investment?

Solar energy stocks haven't been terrific investments in the last few years. Despite advances in efficiency and promotion from governments around the world, most solar stocks languished behind the S&P 500 during the decade-long bull market.

Why are solar energy stocks growing?

The industry's technological advancements and decreasing production costs make solar energy increasingly competitive against conventional energy sources. In addition, government incentives, supportive policies and increasing consumer demand for sustainable energy further drive the growth prospects of solar energy stocks.

Is solar energy a good investment?

Solar energy represents an enormous market opportunity. To decarbonize the economy, the U.S. needs to invest an estimated \$1.2 trillion in solar energy developments alone through 2050. Meanwhile, the global investment opportunity for solar is even larger. Many companies focus on solar energy and should benefit from the sector's growth.
