

Solar power generation and electricity selling scam

Are solar panels a scam?

That is, of course, also a scam. To protect yourself from clean energy scams: Know that "free" or "no cost" solar panel offers are scams. The federal government does not install solar systems in homes for free. If you're considering whether solar energy is right for you, check out the Department of Energy's guide for homeowners and learn more.

What are the most common solar scams?

One of the most prevalent solar scams involves misleading lease agreements or power purchase agreements (PPAs). While these financing options are legitimate ways to access solar energy, unethical companies may misrepresent the terms or benefits of these agreements.

How do you know if a solar system is a scam?

Ask for a list of satisfied customers and look at customer reviews online. Know that the government won't offer you free solar. The federal government does not install residential solar panels for free; if someone is claiming otherwise, it's probably a scam. If it seems too good to be true, it probably is.

How do energy scams work?

They might also offer an "energy audit" to reduce your energy costs or guarantee huge rebates or incentives. From there, the scam can take several turns -- the "salesperson" may ask you to fill out forms with personal information or pay a deposit up front.

Are solar business leads a scam?

At best, this is someone generating leads to sell, not actual solar businesses. At worst, they're scammerstrying to steal your identity. If you spot a scam, tell the Federal Trade Commission at [ReportFraud.ftc.gov](https://www.ftc.gov/identitytheft).

What should I do if a solar business is a scam?

Protect your personal information. Don't respond to unexpected requests online or on social media for your name, address, or other personal information to "see if you qualify." At best, this is someone generating leads to sell, not actual solar businesses. At worst, they're scammers trying to steal your identity.
