

Wuliangye invests in photovoltaic energy storage company

Where is Wuliangye based?

Wuliangye is based in Yibin, Sichuan Province. The company distributes its products all over the domestic market and exports to overseas markets. ^Dao, Zhi. Rare Creatures and Special Local Products in China. DeepLogic. ^'History of Wuliangye'. Wuliangye. Retrieved 12 November 2020.

What is Wuliangye doing now?

Wuliangye has been focusing on strengthening channel management, increasing sales in the higher-margin direct-to-customer and corporate group purchases, as well as optimizing product mix to focus on premium flagship products and streamlining midrange products.

Is Wuliangye a good stock to buy?

Our recent channel check indicates Wuliangye has completed more than 60% of its full-year sales target as of end-April, and inventory remained at a healthy level of 1-1.5 months. We think all these suggest solid demand for Wuliangye's products, and distributors remain confident in the demand outlook.

Is China's photovoltaic industry a good investment?

Amid rising global concerns over energy security and the exacerbation of climate change, the new energy industry continues to present opportunities. Due to supportive policies, China's photovoltaic industry has achieved notable success globally after developing for many years.

How much is wide-moat Wuliangye 000858 worth?

We maintain our fair value estimate of CNY 196 per share for wide-moat Wuliangye 000858, following its in-line 2022 and first-quarter 2023 earnings.

What will China's energy storage demand look like in 2023?

We expect the demand for additional energy storage capacity in mainland China to reach 43 GWh in 2023 and 129 GWh in 2025, indicating a 1.8x annual growth in 2023 and an expected compound annual growth rate (CAGR) of 103% from 2022 to 2025. This year, the commissioning of grid-connected energy storage projects in the US was slightly delayed.

The solar power plant has an installed capacity of 150 MW under standardized conditions. 345,000 crystalline solar PV modules of 390 W each were used. This PV project by EnBW is ...

ESS Inc is a US-based energy storage company established in 2011 by a team of material science and renewable energy specialists. It took them 8 years to commercialize their first ...
